

SECURITY OF PERSONS AND ASSETS

Our back to base CCTV cameras are installed and provide full coverage throughout the estate enabling security personnel to rapidly respond to incidents. We have also established a security project team with the responsibility to upgrade our security processes. They have reviewed current security arrangements and have recommended a strategy that will be effective in integrating CCTV coverage with security personnel to ensure better intervention and coordination with enforcement agencies. Requests for tender have been sent to companies capable of servicing the needs of the community and an appointment will be made in the near future.
